

All the Wealth of the Country Are for the People

In September 2016 the respected Comrade **Kim Jong Un** visited the Ryongaksan Spring Water Factory, which had been renovated as required by the new century.

Stressing that the supply of spring water to the people is a matter related with the spirit of serving the people, he told the officials to carry out this work in a responsible manner.

Saying that there are many quality spring-water sources in different parts of the country, he said that we should build spring water factories with this factory as a model, adding:

It is the genuine advantage of our socialist system centred on the people that it ensures all the wealth of the country are subordinated to promoting the people's well-being. Provinces should survey spring-water sources and push ahead with the work of building modern spring water factories. The Party should give a strong push to this work. The factories should fully ensure the hygienic environment of their production and conduct proper analysis of the water, so as to provide the people with water whose hygiene safety is thoroughly guaranteed. The Cabinet should take measures to make sure that provinces, cities and counties discover quality spring-water sources and supply the water to the local people.
