

## **A Worthwhile Work for the People**

One September day in 2016, the respected Comrade Kim Jong Un visited the newly built Medical Oxygen Factory.

Feasting his eyes on the cozy and clean factory, he spoke highly of its builders for having completed the project within the period set by the Workers' Party of Korea.

Looking round the factory to acquaint himself with its construction and management plan, he said with pleasure: With the construction of a modern medical oxygen factory, it is now possible to provide hospitals with quality medical oxygen. I am very pleased to think that I have done another worthwhile work for the people. This is just my happiness.
