- **Credibility and Transparency**

Mission

To ensure and promote consistent progress of the national insurance industry through its professional and efficient reinsurance protection capacity.

Source of Business

Future Re's reinsurance business will be sourced from local insurers in proportional and non-proportional treaties and facultatives, covering various classes of marine, property, engineering and agricultural insurance, such as Marine Hull, Marine Cargo, Aviation, P&I, Fire, Motor, Machinery, Construction and Erection, Civil Engineering Completed Risks, Crop, Livestock, Personal Accident, etc. Future Re will further develop its local reinsurance business, as well as increasingly broadening its business sphere into international markets.

Prospect of Business

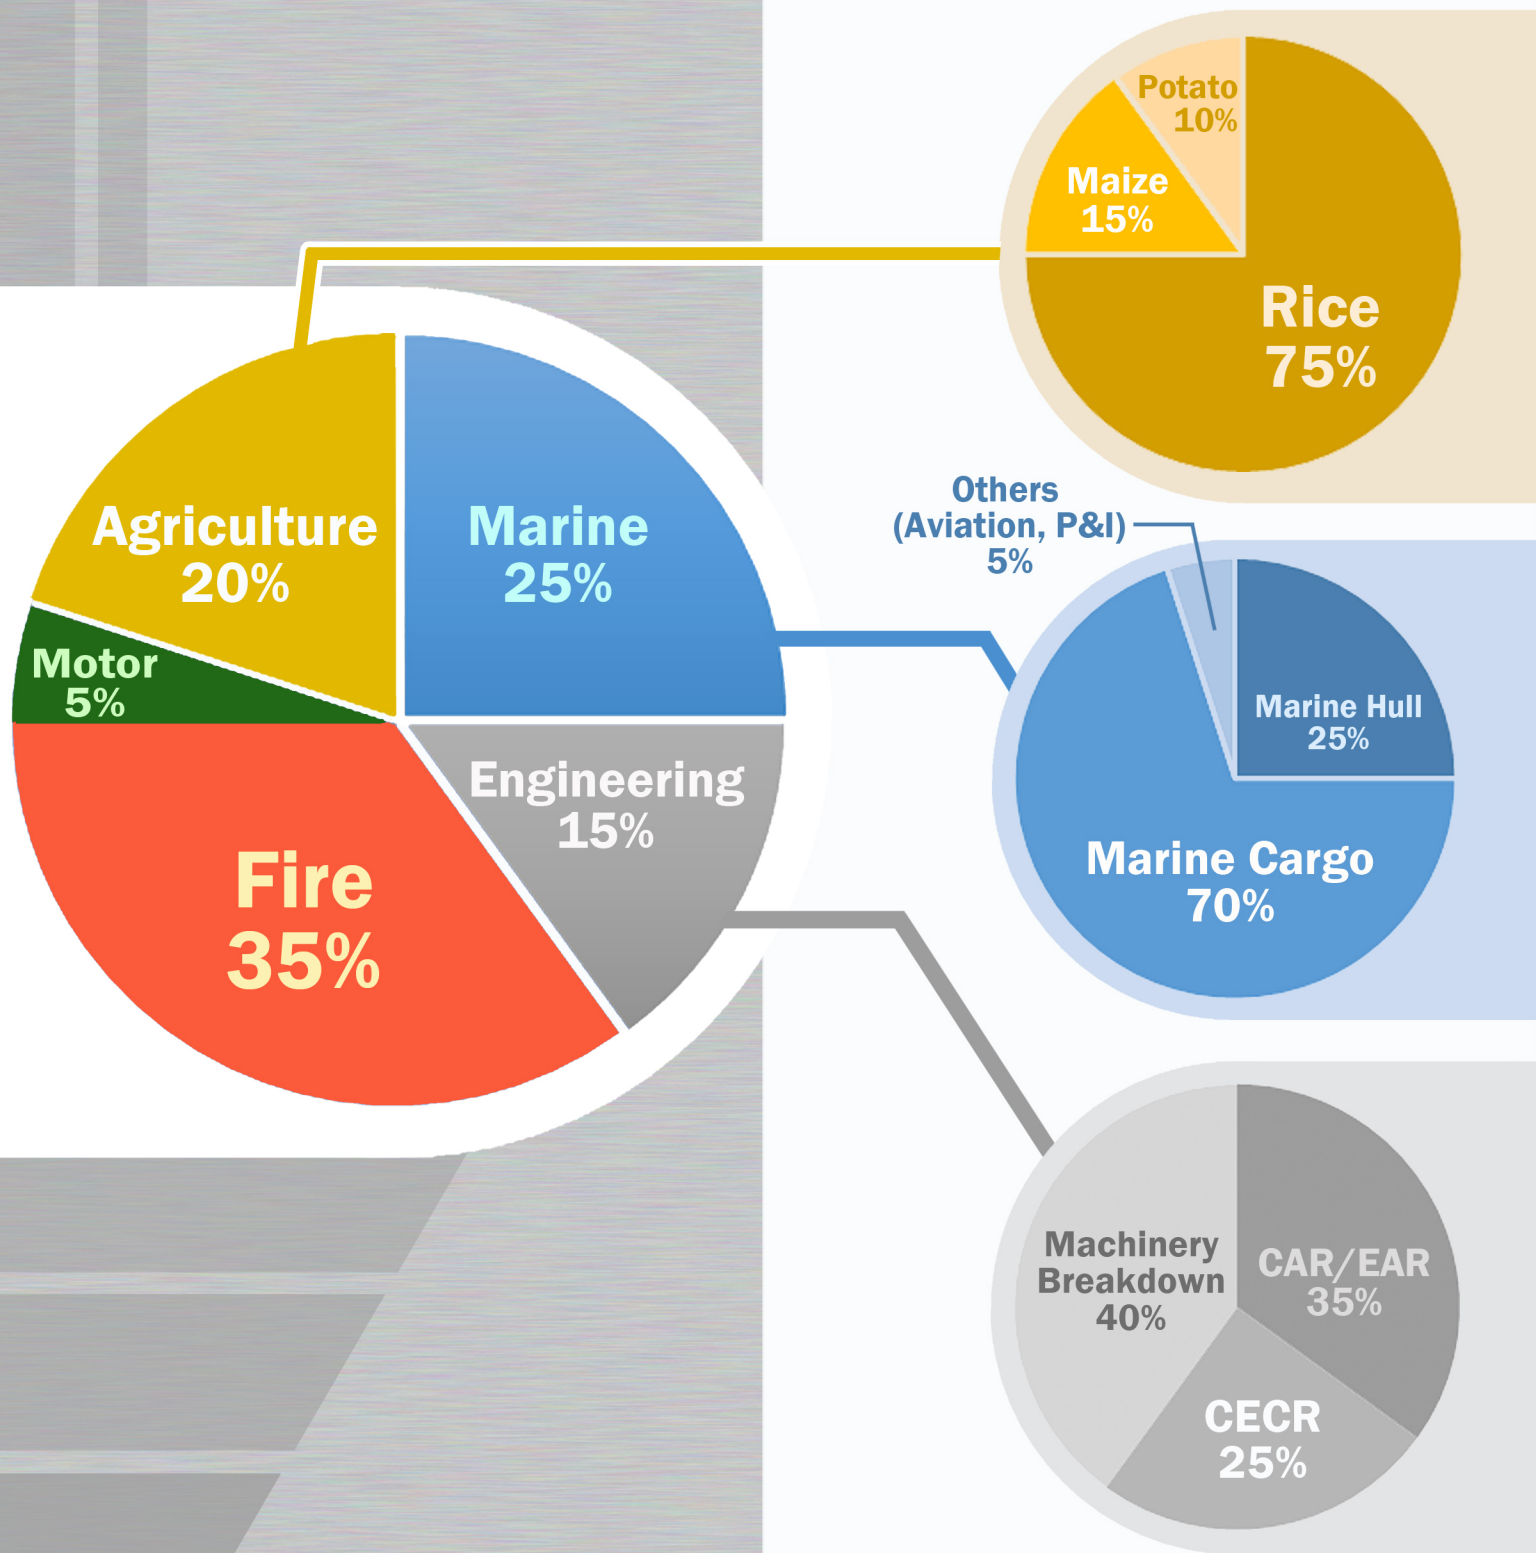

Since Future Re took its first step by providing its capacity to a property reinsurance program, it has achieved remarkable success in property lines in a time span of half a year, presently being capable to expand its capacity to other lines like engineering, marine and agricultural insurances.

Prospect of Business

One of Future Re's top priorities is to make a maximum use of its current capacity with the aim of achieving the target of enhancing its profitability by providing suitable reinsurance protections to clients.

Future Re will actively cooperate with local and international competent (re)insurers and strengthen business ties with reinsurance brokers overseas in order to become a recognized market player in a nearest future.
